DETAILED ACTION

Specification

Priority

1. For benefit claims under 35 U.S.C. 120, 121 or 365(c), the reference must include the relationship (i.e., continuation, divisional, or continuation-in-part) of the applications. This should appear as the first sentence(s) of the specification following the title, preferably as a separate paragraph unless it appears in an application data sheet. The status of nonprovisional parent application(s) (whether patented or abandoned) should also be included. If a parent application has become a patent, the expression "now Patent No. _____" should follow the filing date of the parent application. If a parent application has become abandoned, the expression "now abandoned" should follow the filing date of the parent application.

Claim Objections

2. Claim 22 is objected to because of the following informalities:

Claim 22 has editorial error. It is two-page long. The last part seems to be a duplicate of claim 21. Appropriate correction is required.

Double Patenting

3. Claims 16-18, 21 and 22 are rejected under the judicially created doctrine of obviousness-type double patenting as being unpatentable over claims 1,2,3,7, and 14 of U.S. Patent No. 6,673,721. Although the conflicting claims are not identical, they are not patentably distinct from each other because:

Claims 1,2,3,7, and 14 of U.S. Patent No. 6,673,721 substantially teach the instant claims 16-18, 21 and 22. The instant claims differ from claims 1,2,3,7, and 14 of U.S. 6,673,721 by specifying an integrated circuit structure and openings rather than vias. However, it would have been obvious to one with ordinary skill in the art that vias is one of the most popular structures in the semiconductor device fabrication / integrated circuit interconnection.
